Stabiliser Caliper

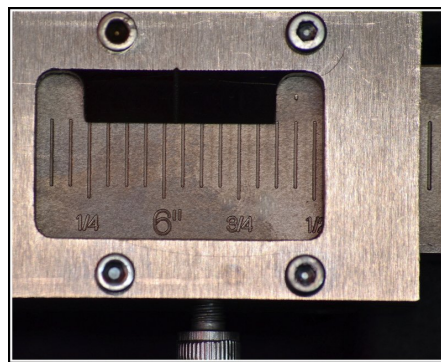

Standard sizes available:

5" through to 9"
9" through to 13"
13" through to 17"
17" through to 21"
21" through to 23"
23" through to 26"

Unique measuring devices designed specifically for the oilfield industry.

Stabiliser Callipers are for checking tolerance on 3 & 5 blade oilfield stabilisers. They are capable of measuring to 1/16" of tolerance although we have the technology to produce instruments that can measure to within 0.001" of tolerance.

These models measure three points to an accuracy of 1/16 of an inch.

Please contact us for more information.
